

DistriCool ready for the new VW Crafter !

Dear Sir ,

Districool is very proud to announce, as one of the first, that today already we can offer you **the insulation kit for the L3H3 VW Crafter panel vans.**

These high quality insulation kit are available in 3 executions :

FRC (deepfreeze 0°C up to minus 20°C)

FNA (refrigerated +10 up to 0°C)

ECO (economic version for positive temperatures)

How DistriCool distinguishes herself from comparable products on the market ?

- easy and quick assembly with 2 Component PU glue (about 16 man-hours)
- great exactitude of dimensions; fits perfectly into the panel van without any necessary adaptations of the vehicle
- only gluing and sealing : no further processing required
- the PU insulation foam omnipresent over complete space behind the DistriCool

- 1,5mm polyester skin ... up to the steel sheeting of the panel van
- DistriCool offers you a wide range of models and options
- ATP certificate available, guaranteeing the K-value level

Put the DistriCool to the test !
